

Five Design Sheets – Visualization 2

Name: Muhammad Ilyas Hasyim Bin Mohd Ismail

Student ID: 34500723

Studio: 06_OnCampus

Tutor: Shaolun Ruan

Sheet 1

Ideas ①

Choropleth map
(smokers per state)

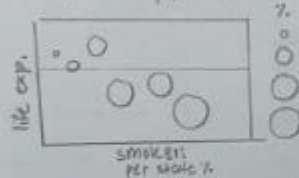

Pie Chart
(total smokers)

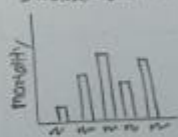

VIC
QLD
NSW
TAS
...

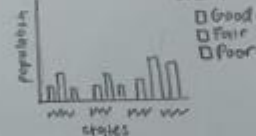

Bubble Plot
(life expectancy)

Diseases (Bar Chart)

Quality of Life (stacked bar chart)

Filter ②

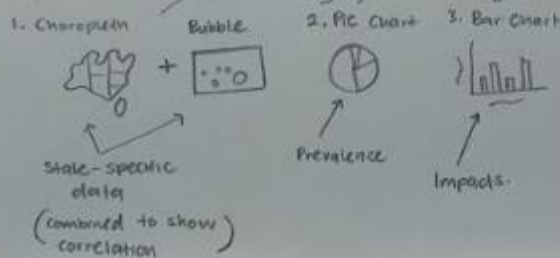

- Choropleth ✓
↳ shows data specific to different states
- Bubble Plot ✓
↳ can be used to reference smoking prevalence from choropleth map
- Pie Chart ✓
↳ use to show which states have the highest number of smokers.
- Bar Chart ✓
↳ To show diseases & mortalities caused by smoking.
- Quality of Life (stacked Bar Chart) X
↳ Not useful information to show impacts of smoking

Categorize ③

- state specific data
- prevalence
- impacts

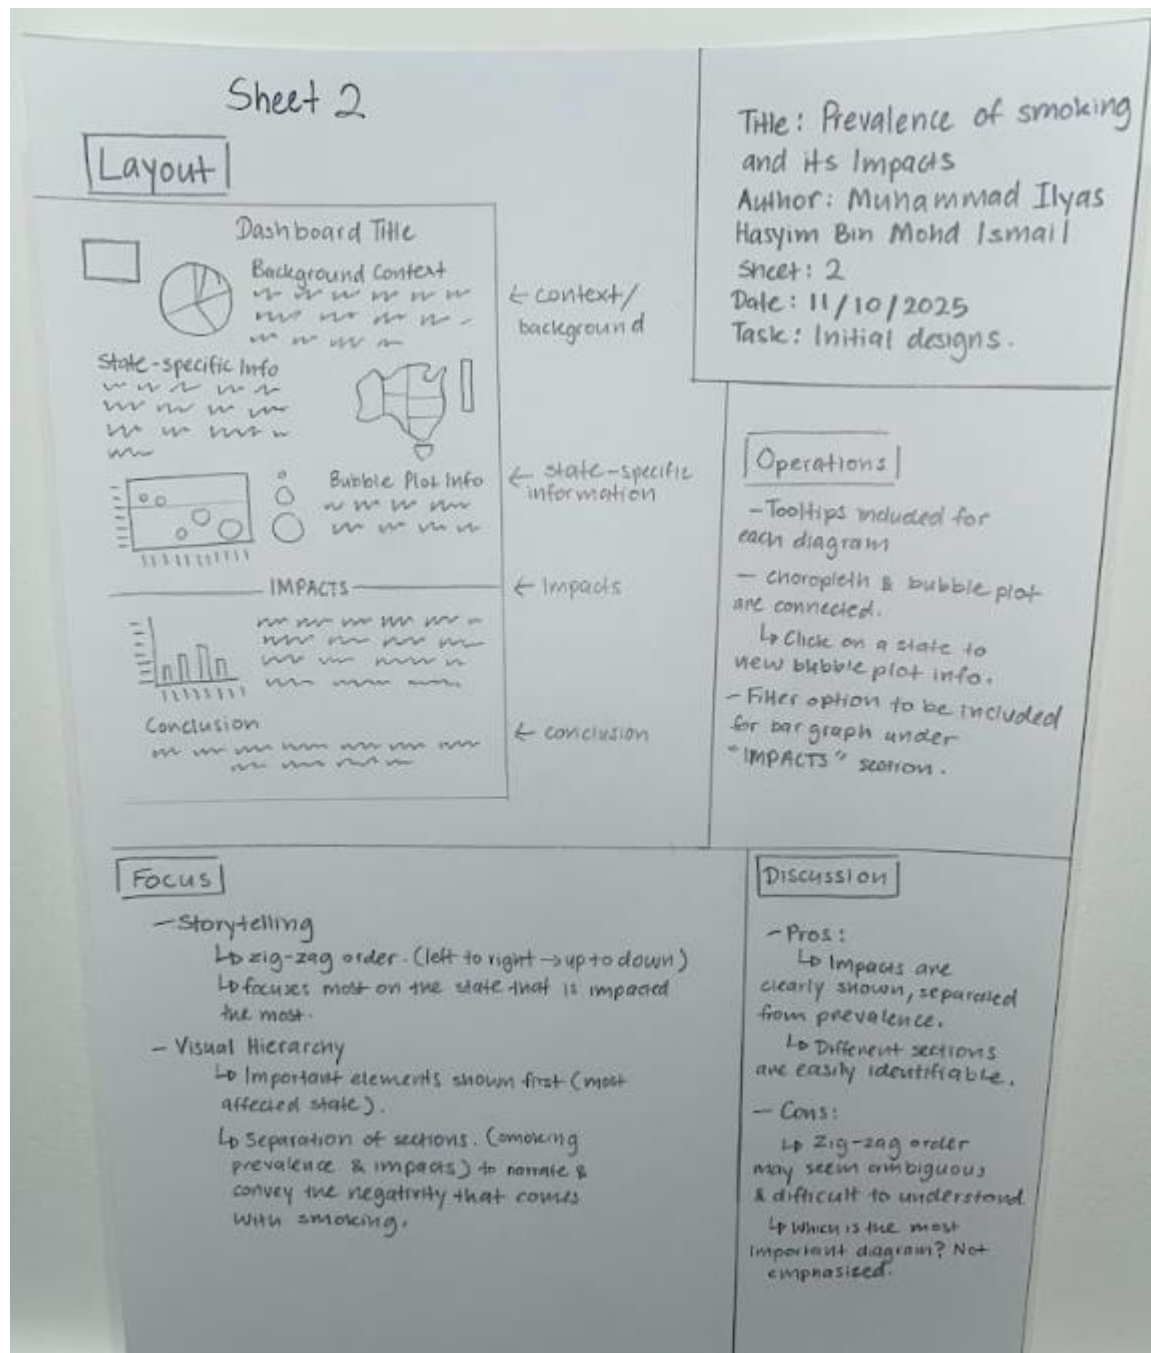

Combine & Refine ④

Order:

Question ⑤

Yes, it illustrates the prevalence of smoking and its impacts to deter people from smoking. Thus combating the issue.

Sheet 3

Layout

①

Dashboard Title

Background Information

State specific information

IMPACTS

Conclusion

Title: Prevalence of smoking and its impacts.

Author: Muhammad Ilyas Hasyim Bin Mohd Ismail

Sheet: 3

Date: 11/10/2025

Task: Improving designs.

Operations

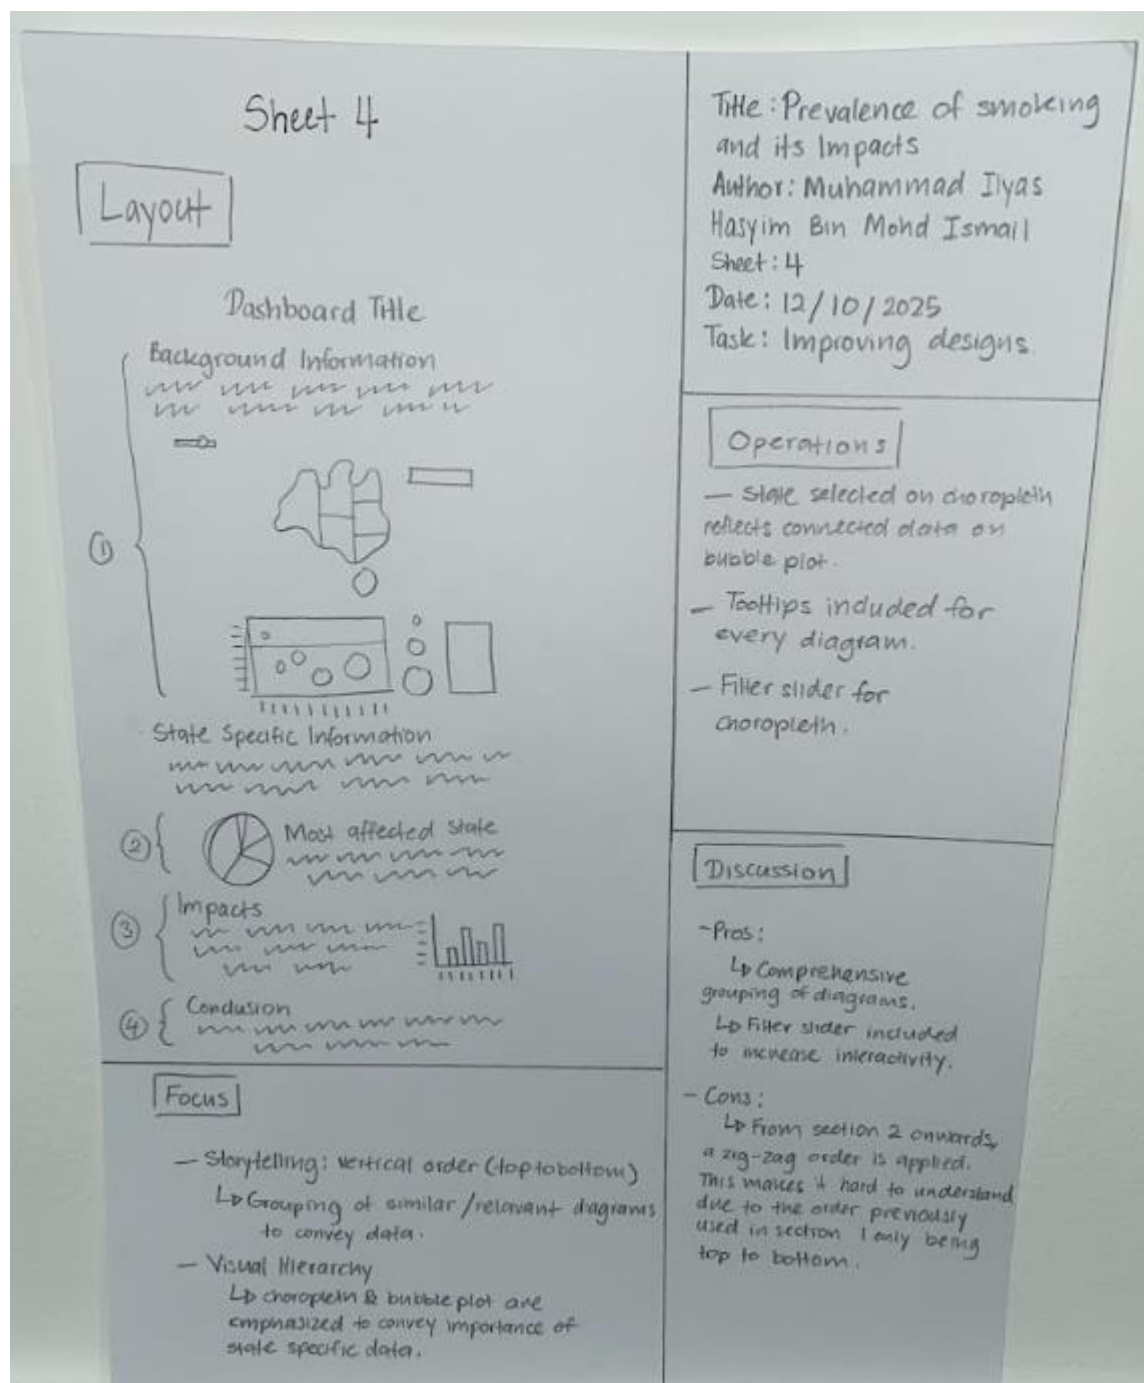

- State selected on choropleth will reflect on bubble plot.
- Tooltips to be included for each diagram

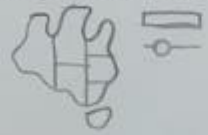

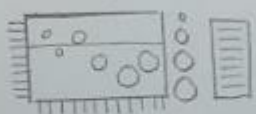

Focus

- Storytelling
 - ↳ Vertical order (top to bottom)
 - ↳ Removal of zig-zag order to reduce confusion in interpreting information.
- Typography
 - ↳ Section headers maintain the same weight, font-style and color to convey the header title of the section. (Title, impacts, conclusion)

Discussion

- Pros:
 - ↳ Easy to understand due to vertical order
- Cons:
 - ↳ Lack of filter options for each diagram
 - ↳ Most important diagram is still not emphasized.

Sheet 5 Layout Dashboard Title Background Information  ①  State specific information ②  Most affected state Impacts ③  Conclusion ④
